PRELIMINARY AMENDMENT Docket No. 4829A Serial 10/822886 Page

## Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the above-identified patent application:

## **Listing of Claims:**

- 1. (original) An agricultural, horticultural, or ornamental crop composition comprising:
- (a) particulate material;
- (b) organic non-vegetable non-fuel high boiling oil; and
- (c) at least one additive selected from the group consisting of ionic salt, colored particle, or surfactant.
- 2. (original) The composition of claim 1 wherein said particulate material (a) is selected from the group consisting of calcium carbonate, talc, kaolin, beneficiated kaolin, bentonites, clays, pyrophyllite, silica, feldspar, sand, quartz, chalk, limestone, precipitated calcium carbonate, diatomaceous earth, and barites.
- 3. (original) The composition of claim 1 wherein said particulate material (a) is selected from the group consisting of calcined calcium carbonate, calcined talc, calcined kaolin, baked kaolin, fired kaolin, hydrophobic treated heat treated kaolin, calcined bentonites, calcined clays, calcined pyrophyllite, calcined silica, calcined feldspar, calcined sand, calcined quartz, calcined chalk, calcined limestone, calcined precipitated calcium carbonate, baked calcium carbonate, calcined diatomaceous earth, calcined barytes, calcined aluminum trihydrate, calcined pyrogenic silica, and calcined titanium dioxide.
- 4. (original) The composition of claim 1 wherein said organic non-vegetable non-fuel high boiling oil (b) is selected from the group consisting of industrial oil, marine oil, saturated and unsaturated C-6 to C-32 fatty acids, animal oil, synthetic oil, and petroleum based oil.

Serial 10/822886

Page

5. (original) The composition of claim 1 wherein said ionic salt (c) is selected from the

group consisting of sodium chloride, potassium chloride, calcium chloride, magnesium chloride,

sodium sulfate, potassium sulfate, calcium sulfate, magnesium sulfate, sodium nitrate, potassium

nitrate, calcium nitrate, magnesium nitrate, sodium carbonate, potassium carbonate, magnesium

carbonate, sodium nitrite, potassium nitrite, copper based salt, silver based salt, potassium

sulfate, and organic water soluble salts.

6. (original) The composition of claim 1 wherein said colorant (c) is selected from the

group consisting of natural iron oxides, black iron oxides, synthetic iron oxides, precipitated red

iron oxide, brown iron oxides, synthetic black iron oxides, copper-black, chrome-black, zinc

magnesium ferrite pigments, carbon black pigments, graphite, aniline black, logwood black lakes,

vellow sulfur, and pigments that selectively reflect or absorb in red, blue, or green regions.

7. (original) The composition of claim 6 wherein said colorant (c) is selected from the

group consisting of yellow limonite, red hematite, brown limonite, Pigment Black 10, copper red,

ferrite red, precipitated red iron oxide, Pigment Brown 6, brown ocher, Pigment Black 1,

synthetic magnetite, copper-black, chrome-black, Pigment Brown 11, mapioc tans, Pigment

Black 6, Pigment Black 7, furnace black, channel black, acetylene black, furnace black, bone

black, lampblack, natural and synthetic graphites, Pigment Black 1, Natural Black 3, Lake, and

Logwood Pigment.

8. (original) The composition of claim 1 wherein said particulate material is a hydrous

kaolin.

9. (original) The composition of claim 1 wherein surfactant (c) is selected from the group

consisting of modified phthalic glycerlol alkyl resins, plant oil based materials with emulsifiers,

polymeric terpenes, and nonionic detergents.

Serial 10/822886

Page

10. (original) The composition of claim 1 wherein at least two of said additives (c) are present.

- 11. (original) A bloom thinning emulsion comprising said composition of claim 1 and additionally comprising water.
  - 12. (original) A method of controlling pests comprising the step of: applying to a substrate a composition comprising:
  - (a) particulate material;
  - (b) organic non-vegetable non-fuel high boiling oil; and
  - (c) additive selected from the group consisting of ionic salt, colored particle, or surfactant.
- 13. (original) The method of claim 12 wherein said particulate material (a) is selected from the group consisting of calcium carbonate, talc, kaolin, beneficiated kaolin, bentonites, clays, pyrophyllite, silica, feldspar, sand, quartz, chalk, limestone, precipitated calcium carbonate, diatomaceous earth, and barites.
- 14. (original) The method of claim 12 wherein said particulate material (a) is selected from the group consisting of calcined calcium carbonate, calcined talc, calcined kaolin, baked kaolin, fired kaolin, hydrophobic treated heat treated kaolin, calcined bentonites, calcined clays, calcined pyrophyllite, calcined silica, calcined feldspar, calcined sand, calcined quartz, calcined chalk, calcined limestone, calcined precipitated calcium carbonate, baked calcium carbonate, calcined diatomaceous earth, calcined barytes, calcined aluminum trihydrate, calcined pyrogenic silica, and calcined titanium dioxide.
- 15. (original) The method of claim 12 wherein said non-vegetable non-fuel high boiling oil (b) is selected from the group consisting of industrial oil, marine oil, paraffin oils, saturated and

Page

unsaturated C-6 to C-32 fatty acids, animal oil, synthetic oil, and petroleum based oil.

5

16. (original) The method of claim 12 wherein said ionic salt (c) is selected from the group consisting of sodium chloride, potassium chloride, calcium chloride, magnesium chloride, sodium sulfate, potassium sulfate, calcium sulfate, magnesium sulfate, sodium nitrate, potassium nitrate, calcium nitrate, magnesium nitrate, sodium carbonate, potassium carbonate, magnesium carbonate, sodium nitrite, potassium nitrite, copper based salt, silver based salt, potassium

sulfate, and organic water soluble salt.

17. (original) The method of claim 12 wherein said colorant (c) is selected from the group

consisting of natural iron oxides, black iron oxides, synthetic iron oxides, precipitated red iron

oxide, brown iron oxides, synthetic black iron oxides, copper-black, chrome-black, zinc

magnesium ferrite pigments, carbon black pigments, graphite, aniline black, logwood black lakes,

yellow sulfur, and pigments that selectively reflect or absorb in red, blue, or green regions.

18. (original) The method of claim 17 wherein said colorant (c) is selected from the group

consisting of yellow limonite, red hematite, brown limonite, Pigment Black 10, copper red, ferrite

red, precipitated red iron oxide, Pigment Brown 6, brown ocher, Pigment Black 1, synthetic

magnetite, copper-black, chrome-black, Pigment Brown 11, mapioc tans, Pigment Black 6,

Pigment Black 7, furnace black, channel black, acetylene black, furnace black, bone black,

lampblack, natural and synthetic graphites, Pigment Black 1, Natural Black 3, Lake, and

Logwood Pigment.

19. (original) The method of claim 12 wherein said particulate material is a hydrous

kaolin.

20. (original) The method of claim 12 wherein surfactant (c) is selected from the group

consisting of modified phthalic glycerlol alkyl resins, plant oil based materials with emulsifiers,

Serial 10/822886

Page

polymeric terpenes, and nonionic detergents.

21. (original) The method of claim 12 wherein at least two of said additives (c) are present.

22. (original) The method of claim 12 wherein said substrate is selected from the group

consisting of soil; peat; compost; vermiculite; rockwool; synthetic growing media; weeds; weed

roots; weed seeds; non-agricultural plants located near agricultural crops; and non-useful, non-

ornamental plants.

23. (original) The method of claim 12 wherein said composition additionally comprises (d)

plant producing media selected from the group consisting of soil; peat; compost; vermiculite;

rockwool; synthetic growing media, sand, soil remediation materials, polyacrylates, humus, and

surface treated soil.

24. (new) An agricultural, horticultural, or ornamental crop composition comprising:

(a) particulate material; and

(b) at least one additive selected from the group consisting of plant producing media and

salt.

25. (new) The composition of claim 24 wherein said at least one additive (b) is salt.

26. (new) The composition of claim 24 wherein said at least one additive (b) is plant

producing media.

27. (new) The composition of claim 24 wherein said at least one additive (b) is plant

producing media and salt.

PRELIMINARY AMENDMENT

28. (new) The composition of claim 24 wherein said particulate material (a) is selected

from the group consisting of calcium carbonate, talc, kaolin, beneficiated kaolin, bentonites,

clays, pyrophyllite, silica, feldspar, sand, quartz, chalk, limestone, precipitated calcium carbonate,

diatomaceous earth, and barites.

29. (new) The composition of claim 24 wherein said particulate material (a) is selected

from the group consisting of calcined calcium carbonate, calcined talc, calcined kaolin, baked

kaolin, fired kaolin, calcined bentonites, calcined clays, calcined pyrophyllite, calcined silica,

calcined feldspar, calcined sand, calcined quartz, calcined chalk, calcined limestone, calcined

precipitated calcium carbonate, baked calcium carbonate, calcined diatomaceous earth, calcined

barytes, calcined aluminum trihydrate, calcined pyrogenic silica, and calcined titanium dioxide.

30. (new) The composition of claim 28 wherein said particulate material (a) is

hydrophobically treated.

31. (new) The composition of claim 29 wherein said particulate material (a) is

hydrophobically treated.

32. (new) The composition of claim 26 wherein said plant producing media is selected

from the group consisting of soil, peat, compost, vermiculite, rockwool, sand, soil remediation

materials, polyacrylates, and humus.

33. (new) The composition of claim 24 additionally comprising:

(c) at least one agrichemical.

34. (new) The composition of claim 33 wherein said at least one agrichemical

(c) is selected from the group consisting of nutrients, microbial agents, fertilizers,

herbicides, pesticides, fungicides, and insecticides.

Serial 10/822886

Page

35. (new) The composition of claim 25 wherein said salt is selected from the group

consisting of sodium chloride, potassium chloride, calcium chloride, magnesium chloride, sodium

sulfate, potassium sulfate, calcium sulfate, magnesium sulfate, sodium nitrate, potassium nitrate,

calcium nitrate, magnesium nitrate, sodium carbonate, potassium carbonate, magnesium

carbonate, sodium nitrite, potassium nitrite, copper based salt, silver based salt, potassium

sulfate, and organic water soluble salt.

36. (new) A method of controlling pests comprising the step of:

applying to a substrate a composition comprising:

(b) particulate material; and

(b) at least one additive selected from the group consisting of plant producing media and

salt.

37. (new) The method of claim 36 wherein said at least one additive (b) is salt.

38. (new) The method of claim 36 wherein said at least one additive (b) is plant

producing media.

39. (new) The method of 36 wherein said at least one additive (b) is plant producing

media and salt.

40. (new) The method of claim 36 wherein said particulate material (a) is selected from

the group consisting of calcium carbonate, talc, kaolin, beneficiated kaolin, bentonites, clays,

pyrophyllite, silica, feldspar, sand, quartz, chalk, limestone, precipitated calcium carbonate,

diatomaceous earth, and barites.

41. (new) The method of claim 36 wherein said particulate material (a) is selected from

the group consisting of calcined calcium carbonate, calcined talc, calcined kaolin, baked kaolin, fired kaolin, calcined bentonites, calcined clays, calcined pyrophyllite, calcined silica, calcined feldspar, calcined sand, calcined quartz, calcined chalk, calcined limestone, calcined precipitated

calcium carbonate, baked calcium carbonate, calcined diatomaceous earth, calcined barytes,

calcined aluminum trihydrate, calcined pyrogenic silica, and calcined titanium dioxide.

42. (new) The method of claim 36 wherein said plant producing media (b) is selected

from the group consisting of soil, peat, compost, vermiculite, rockwool, sand, soil remediation

materials, polyacrylates, and humus.

43. (new) The method of claim 36 wherein said salt (b) is selected from the group

consisting of sodium chloride, potassium chloride, calcium chloride, magnesium chloride, sodium

sulfate, potassium sulfate, calcium sulfate, magnesium sulfate, sodium nitrate, potassium nitrate,

calcium nitrate, magnesium nitrate, sodium carbonate, potassium carbonate, magnesium

carbonate, sodium nitrite, potassium nitrite, copper based salt, silver based salt, potassium

sulfate, and organic water soluble salt.
